
PROJECT SCOPE DOCUMENT

Client: Ailien Shopify Stores
Date: 23rd May 2026
Prepared by: Anthony Usoro — AI Integration Developer

1. Problem Statement

Customer support team spends 4 hours/day answering repetitive FAQ, pulling them from revenue-generating work.

2. Success Criteria

Reduce FAQ response time from 2 hours to instant. Freeing up 3 staff hours daily.

3. Deliverables

Table

Feature	Description	Included?	
AI chat endpoint	/chat with GPT-4o-mini	✓	
Conversation memory	Remembers context across sessions	✓	
Document RAG	Answers from client's FAQ	✓	
Budget guardrails	\$0.01/request default limit	✓	
Deployment to Render	Live URL, SSL, auto-deploy	✓	
NOT Included	Custom frontend UI	✗ (add \$500)	
NOT Included	WhatsApp/Slack integration	✗ (add \$800)	
NOT Included	Multi-language support	✗ (add \$300)	

4. Timeline

Table

Phase	Days	Deliverable	
Discovery & docs	1-2	Receive client documents, finalize scope	
Build	3-5	API endpoints, RAG setup, testing	
Deploy	1	Render deployment, health check	

Phase	Days	Deliverable	
Handoff	1	Documentation, 30-min walkthrough	

****Total: 7 days from signed scope.****

5. Investment

Table

Package	Price	Best For	Included?
Basic	\$500	Single endpoint, no memory, no RAG	
Standard	\$1,500	Full chatbot + memory + RAG + deploy	✓
Premium	\$3,000	Everything + function calling + custom tools	

I picked Standard because Basic does not have memory and RAG which is not useful as a shopify chatbot as it wont have context. Premium is too expensive and complex for this particular shopify store.

Payment: 50% upfront to start, 50% on deployment.

6. Assumptions

- Client provides FAQ/documents within 48 hours
- API keys (OpenAI) provided by client or billed at cost + 20%
- One revision round included; additional revisions \$100/hour

7. Three Not included items they'd likely ask for

NOT Included	Custom frontend UI	✗ (add \$500)
NOT Included	WhatsApp/Slack integration	✗ (add \$800)
NOT Included	Multi-language support	✗ (add \$300)
